## Round Cafeteria and Square Cafeteria- Assembly Instructions

### ASSEMBLY INSTRUCTIONS FOR ROUND & SQUARE CAFETERIA TABLES

1. Attach two “l” shaped bases to each large base with 3/8” x 3” hex bolts (there are two bolts per “L” base). Loosely tighten each bolt. Note: All sway braces must be facing each other – Diagram #1.
2. Lay tabletop upside down on smooth clean surface. Turn the assembled base upside down with mounting plates centered on table back – Diagram #2.
3. Attach bases to bottom of tabletop with 5/8” self-tapping screws. Secure the sway braces with same type of screws.  
Note: Bases must be in a 90° position and sway braces must be facing the center of the tabletop bottom. **DO NOT OVERTIGHTEN** screws; this could cause stripping.
4. After the assembled base and sway braces have been secured to tabletop bottom, tighten the 8 – 3/8” x 3” hex bolts with a wrench. **DO NOT OVERTIGHTEN.**
5. With assistance from another person, hold bench seats upside down up to the mounting plates, attach with 5/8” screws. Secure sway braces. NOTE: Sway braces must face center of benches. Repeat process with remaining benches.
6. After all sway braces are secured in position, tighten all bolts. After all bolts have been securely tighten, flip table over. Table is now ready for years of use.
